1.1 Product identifier

Product Name  Nitric acid 60%

Chemical name  Nitric acid
CAS-No 7697-37-2
EC-No 231-714-2
REACH registration number 01-2119487297-23-0027
Formula HNO3

1.2 Relevant identified uses of the substance or mixture and uses advised against

Recommended Use  Industrial use, Professional use. See annex for more detailed information.
Uses advised against  Consumer use.

1.3 Details of the supplier of the safety data sheet

OCI Nitrogen BV
Mijnweg 1
P.O. Box 601
6160 AP Geleen, The Netherlands
Tel: +31 (0) 46 7020111
www.ocinitrogen.com
info.agro@ocinitrogen.com

1.4 Emergency telephone number

UK National Health Service (NHS) call 111 or, in life-threatening emergencies, call 999

WAL National Health Service (NHS) call 0845 46 47

IE National Poisons Information Centre
+353 1 809 2566 or +353 1 837 9964 (only for healthcare professionals)

Manufacturer: Alert & Care Centre Chemelot (Geleen, The Netherlands)
+31 46 4765555 (24/7)

SECTION 2: HAZARDS IDENTIFICATION

2.1 Classification of the substance or mixture

<table>
<thead>
<tr>
<th>Classification (1272/2008/EC)</th>
<th>Category</th>
</tr>
</thead>
<tbody>
<tr>
<td>Acute Inhalation Toxicity</td>
<td>Category 3 - H331</td>
</tr>
<tr>
<td>Skin Corrosion/Irritation</td>
<td>Category 1A - H314</td>
</tr>
<tr>
<td>Corrosive to Metals</td>
<td>Category 1 - H290</td>
</tr>
</tbody>
</table>

For the full text of the H-Statements mentioned in this section, see Section 16.

2.2 Label elements
Signal word
Danger

Hazard statements
H290 - May be corrosive to metals
H314 - Causes severe skin burns and eye damage
H331 - Toxic if inhaled

EUH071 - Corrosive to the respiratory tract

Precautionary Statements
P260 - Do not breathe dust/fume/gas/mist/vapours/spray
P280 - Wear protective gloves/protective clothing/eye protection/face protection
P301 + P330 + P331 - IF SWALLOWED: rinse mouth. Do NOT induce vomiting
P303 + P361 + P353 - IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower
P304 + P340 - IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing
P305 + P351 + P338 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing
P310 - Immediately call a POISON CENTER or doctor/physician
P403 + P233 - Store in a well-ventilated place. Keep container tightly closed

2.3 Other hazards
None known.

SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS

3.1 Substances

<table>
<thead>
<tr>
<th>Chemical name</th>

Concentration Limits Oxid. Liquid 2 >= 99.0%, Oxid. Liquid 3 >= 65.0% < 99.0%, Skin Corr. 1A >= 20.0%, Skin Corr. 1B >= 5.0% < 20.0%, Acute Tox. 3 >26% <=100%, Acute Tox. 4 >13% <=26%.

For the full text of the H-Statements mentioned in this section, see Section 16.
SECTION 4: FIRST AID MEASURES

4.1 Description of first aid measures

**General Advice**
Immediate medical attention is required. Remove from exposure, lie down. Do not breathe vapours, mist or gas. Do not get in eyes, on skin, or on clothing. Use first aid treatment according to the nature of the injury: Flush with plenty of water or Diphotherine.

**Eye Contact**
Get medical attention. Immediately flush with plenty of water. After initial flushing, remove any contact lenses and continue flushing for at least 15 minutes.

**Skin Contact**
Get medical attention. Wash off immediately with soap and plenty of water while removing all contaminated clothes and shoes. Wash contaminated clothing before re-use.

**Ingestion**
Get medical attention. Rinse mouth thoroughly with water. Give small quantities of water to drink. Do not induce vomiting without medical advice. Never give anything by mouth to an unconscious person. If victim is unconscious, monitor pulse, breathing and airway.

**Inhalation**
Get medical attention. Remove to fresh air and keep at rest in a position comfortable for breathing. If breathing is difficult, (trained personnel should) give oxygen. It may be dangerous to give mouth-to-mouth resuscitation. Move to fresh air in case of accidental inhalation of vapours or decomposition products: Symptoms may be delayed.

**Protection of first-aiders**
Use personal protective equipment. Avoid contact with skin, eyes and clothing.

4.2 Most important symptoms and effects, both acute and delayed

**Main symptoms**
Causes severe skin burns and eye damage. Can burn mouth, throat, and stomach. Pain, blistering, Burning feeling and temporary redness.

4.3 Indication of any immediate medical attention and special treatment needed

**Notes to physician**
Treat symptomatically. Symptoms may be delayed.

SECTION 5: FIREFIGHTING MEASURES

5.1 Extinguishing media

**Suitable Extinguishing Media**
The product itself does not burn. Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.

**Unsuitable Extinguishing Media**
None known.

5.2 Special hazards arising from the substance or mixture

**Special Hazard**
Heating of containers may cause pressure rise, with risk of bursting. Thermal decomposition can lead to release of irritating and toxic gases and vapours: Nitrogen oxides (NOₓ). Contact with metals may evolve flammable hydrogen gas.

5.3 Advice for firefighters

**Fire fighting measures**
Evacuate non-essential personnel.

**Special protective equipment for fire-fighters**
Wear self-contained breathing apparatus and protective suit.
SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures

Ensure adequate ventilation. Evacuate non-essential personnel. Avoid contact with skin, eyes and clothing. Avoid breathing vapours or mists. Do not touch or walk through spilled material. In case of insufficient ventilation, wear suitable respiratory equipment.

6.2 Environmental precautions

Prevent further leakage or spillage if safe to do so. Prevent entry into waterways, sewers, basements or confined areas. Local authorities should be advised if significant spillages cannot be contained.

6.3 Methods and material for containment and cleaning up

The product should not be allowed to enter drains, water courses or the soil. The spilled material may be neutralized with sodium carbonate, sodium bicarbonate or calcium hydroxide. Contain spillage, and then collect with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local / national regulations (see section 13).

6.4 Reference to other sections

See sections 8 and 13.

SECTION 7: HANDLING AND STORAGE

7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice. Avoid contact with skin, eyes and clothing. Avoid breathing vapours or mists. Contact lenses should not be worn when working with this product. Wash hands thoroughly after handling. Do not eat, drink and smoke in work areas; wash hands after use; remove contaminated clothing and protective equipment before entering eating areas. See annex for more detailed information.

7.2 Conditions for safe storage, including any incompatibilities

7.3 Specific end use(s)

**Predicted No Effect Concentration (PNEC)**

No information available.

**8.2 Exposure controls**

**Appropriate Engineering Controls**

Ensure adequate ventilation, especially in confined areas. Ensure that eyewash stations and safety showers are close to the workstation location. Additional advice: Portable Diphoterine eyewashers. See annex for more detailed information.

**Individual protection measures, such as personal protective equipment**

- **Eye Protection**
  - Tightly fitting safety goggles.
  - Protective gloves: (EN 374), Fluorinated rubber FKM, Viton®, 0.4mm >8h.
  - Polychloroprene (CR), Butyl rubber, Polyvinylchloride (PVC), 0.5mm >=2h.
  - Unsuitable materials: Nitrile rubber, Natural Rubber.

- **Hand Protection**
  - Wear suitable protective clothing: Chemical resistant apron, Boots.

- **Skin and body protection**
  - Wear respiratory protection: Wear a positive-pressure supplied-air respirator or Full face mask.

- **Recommended Filter Type**
  - NO- P3, Color code: White - Blue.

- **Hygiene Measures**
  - Handle in accordance with good industrial hygiene and safety practice. Avoid contact with skin, eyes and clothing. Do not eat, drink or smoke when using this product.

- **Environmental exposure controls**
  - The product should not be allowed to enter drains, water courses or the soil.
SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

9.1 Information on basic physical and chemical properties

**Physical state @20°C**
- Appearance: fluid
- Colour: Colourless / Brown
- Odour: Pungent

**Odour threshold**
- 0.75 - 2.5 ppm

**pH**
- < 1

**Melting/freezing point**
- -35 to -18 °C

**Boiling point/boiling range**
- 104 - 122 °C

**Flash point**
- Not applicable

**Evaporation rate**
- No information available

**Flammability (solid, gas)**
- Not flammable

**Flammability Limits in Air**
- Not applicable

**Vapour pressure**
- 9.4-9.5 hPa, 55%-70% (@20 °C)

**Vapour density**
- 2.2 (air = 1)

**Relative density**
- 1.35 (water = 1)

**Solubility**
- Soluble, (Completely miscible)

**Partition coefficient (n-octanol/water)**
- No information available

**Autoignition temperature**
- Not applicable

**Decomposition temperature**
- >200 °C

**Viscosity, dynamic**
- 0.75 mPa.s (@ 25°C) 100%

**Explosive properties**
- No information available

**Oxidising properties**
- See section 3.2

9.2 Other information

SECTION 10: STABILITY AND REACTIVITY

10.1 Reactivity

Corrosive to Metals.

10.2 Chemical stability

Stable under normal conditions.

10.3 Possibility of hazardous reactions

The product reacts with metals with evolution of highly flammable hydrogen. Reacts with water: (exothermic reaction). Risk of explosion in confined areas and in contact with incompatible materials.

10.4 Conditions to avoid

Keep away from heat and sources of ignition.

10.5 Incompatible materials

10.6 Hazardous decomposition products

Hydrogen gas, Nitrogen oxides (NOx), Carbon oxides.
SECTION 11: TOXICOLOGICAL INFORMATION

11.1 Information on toxicological effects

Acute Toxicity

<table>
<thead>
<tr>
<th>Ingestion</th>
<th>Causes burns of the upper digestive and respiratory tracts by strong corrosion.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Skin Contact</td>
<td>Corrosive to skin. Corrosive to eyes.</td>

</tbody>
</table>

![Chemical name](Nitric acid) ![LD50 Oral](> 2.65 mg/L ( Rat ) 4h) ![LD50 Dermal](Nitric acid) ![LC50 Inhalation](> 2.65 mg/L ( Rat ) 4h)

Skin Corrosion/Irritation: Corrosive to skin. Causes severe skin burns and eye damage.

Serious eye damage/irritation: Corrosive to eyes. Causes severe damage to eyes.

Respiratory or skin sensitisation: Based on available data, the classification criteria are not met.

Germ Cell Mutagenicity: Not known to cause heritable genetic damage.

Carcinogenicity: Contains no ingredient listed as a carcinogen.

Reproductive Toxicity: Not known to cause birth defects or have a deleterious effect on a developing fetus. Not known to adversely affect reproductive functions and organs.

STOT-single exposure: Corrosive to respiratory system.

STOT-repeated exposure: Based on available data, the classification criteria are not met.

Aspiration Hazard: Based on available data, the classification criteria are not met.
SECTION 12: ECOLOGICAL INFORMATION

12.1 Toxicity

Based on available data, the classification criteria are not met. May cause adverse effects in the aquatic environment due to changes in pH.

<table>
<thead>
<tr>
<th>Chemical name</th>
<th>Toxicity to Algae</th>
<th>Toxicity to Fish</th>
<th>Toxicity to Micro-organisms</th>
<th>Toxicity to daphnia and other aquatic invertebrates</th>

</tr>
</tbody>
</table>

12.2 Persistence and degradability

Readily biodegradable.

12.3 Bioaccumulative potential

Does not bioaccumulate.

12.4 Mobility in soil

No information available.

12.5 Results of PBT and vPvB assessment

This substance is not considered to be persistent, bioaccumulating nor toxic (PBT). This substance is not considered to be very persistent nor very bioaccumulating (vPvB).

12.6 Other adverse effects

May cause adverse effects in the aquatic environment due to changes in pH.

SECTION 13: DISPOSAL CONSIDERATIONS

13.1 Waste treatment methods

Waste from residues / unused products
Dispose of in accordance with local regulations.

Contaminated Packaging
Empty containers should be taken to an approved waste handling site for recycling or disposal.
SECTION 14: TRANSPORT INFORMATION

According to: ADR, RID, ADN, IMDG, IATA/ICAO.

14.1 UN number

UN  2031

14.2 UN proper shipping name

NITRIC ACID

14.3 Transport hazard class(es)

8

14.4 Packing group

II

14.5 Environmental hazards

Not applicable.

14.6 Special precautions for user

See transport regulations for UN number specific special precautions.
Inland waterway transport (ADN) PP 81: Shelf life Plastic container.

14.7 Transport in bulk according to Annex II of MARPOL and the IBC Code

See section 17, IBC Code.

SECTION 15: REGULATORY INFORMATION

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

Quantity 1: 50t, Quantity 2: 200t.

15.2 Chemical safety assessment

A Chemical Safety Assessment has been carried out for this substance. See annex for more detailed information.
### SECTION 16: OTHER INFORMATION

**Full text of H-Statements referred to under sections 2 and 3**
- H272 - May intensify fire; oxidiser
- H290 - May be corrosive to metals
- H314 - Causes severe skin burns and eye damage
- H331 - Toxic if inhaled
- EUH071 - Corrosive to the respiratory tract

**Abbreviations and acronyms**
- STOT: Specific Target Organ Toxicity
- PBT: Persistent, Bioaccumulative, Toxic
- vPvB: very Persistent and very Bioaccumulating
- ADR: Accord européen relatif au transport international des marchandises Dangereuses par Route (European Agreement concerning the International Carriage of Dangerous Goods by Road)
- EC: European Commission
- RID: Règlement concernant le transport international ferroviaire des marchandises dangereuses (Regulations for the International Transport of Dangerous Goods by Rail)
- ADN: Accord européen relatif au transport international des marchandises Dangereuses par voies de Navigation intérieures (European Agreement concerning the International Carriage of Dangerous Goods by Inland Waterways)
- ICAO: International Civil Aviation Organization
- REACH: Registration, Evaluation, Authorisation and Restriction of Chemical substances
- ES: Exposure Scenario
- DNEL: Derived No Effect Level
- PNEC: Predicted No Effect Concentration

**Revision note**

**Training Advice**
Workers must be trained in the proper use and handling of this product as required under applicable regulations.

**SDS No.**
OC00019

**Disclaimer**
The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.
1. EXPOSURE SCENARIO

Exposure scenario  1
Title Manufacturing

Use descriptor

Process categories
PROC1 - Use in closed process, no likelihood of exposure
PROC2 - Use in closed, continuous process with occasional controlled exposure (e.g. sampling)
PROC3 - Use in closed batch process (synthesis or formulation); Industrial setting
PROC4 - Use in batch and other process (synthesis) where opportunity for exposure arises
PROC8a - Transfer of substance or mixture (charging/discharging) from/to vessels/large containers at non dedicated facilities
PROC 8b - Transfer of substance or preparation (charging/discharging) from/to vessels/large containers at dedicated facilities
PROC9 - Transfer of substance or mixture into small containers (dedicated filling line, including weighing)
PROC15 - Use as laboratory reagent

Environmental release categories ERC1 - Manufacture of substances

2. CONDITIONS OF USE AFFECTING EXPOSURE

Product characteristics
Physical state @20°C Liquid, Aqueous solution.
Concentration of substance in product 60%.

Frequency and duration of use ≤ 8 hours/day.

Control of environmental exposure
Environmental Release Category ERC1 - Manufacture of substances
Product characteristics Liquid
Frequency and duration of use ≤ 8 hours/day
Control of environmental exposure Not required

Control of worker exposure
Process category
PROC1 - Use in closed process, no likelihood of exposure
PROC2 - Use in closed, continuous process with occasional controlled exposure
PROC3 - Use in closed batch process (synthesis or formulation)
PROC4 - Use in batch and other process (synthesis) where opportunity for exposure arises
PROC8a - Transfer of substance or preparation (charging/discharging) from/to vessels/large containers at non dedicated facilities
PROC 8b - Transfer of substance or preparation (charging/discharging) from/to vessels/large containers at dedicated facilities
PROC9 - Transfer of substance or preparation into small containers (dedicated filling line, including weighing)
PROC15 - Use as laboratory reagent

Product characteristics Liquid
Frequency and duration of use ≤ 8 hours/day

Technical conditions and measures at process level (source) to prevent release
Containment: Under standard operating conditions the substance is rigorously contained by technical means in the working area. The activities take place in a standardized way, under controlled conditions with dedicated equipment. In case a certain amount of the substance is not contained, a worker is not exposed to the substance as the use takes place in a fume hood or as the worker wears personal protective equipment and uses local exhaust ventilation. Formation of aerosols/mists/splashes is prevented.

Organisational measures: Minimise the number of staff in the working area. Minimise manual activities. Train employees how to safely handle the substance, incl. how to use personal protection equipment. Regularly clean up the working area. Have supervision in place to regularly check that the conditions of use are followed by the workers. Ensure that all equipment is well maintained.
Ascertain that personal protection equipment is available and used according to the instructions. Ensure that eyewash stations and safety showers are available in the working area.

Suitable material: The recommended material for tanks, vessels and accessories is low carbon...
Unsuitable materials: Do not use any metal, carbon steel or polypropylene. Ventilation conditions in the working area: Use only outdoors or in a well-ventilated area (approximately 5 air changes per hour). Storage conditions: Store in a well-ventilated place (preferably outside). In an area equipped with acid resistant flooring. Protect from sunlight. Keep containers tightly closed. Keep away from combustible materials, heat, hot surfaces, sparks, open flames and other ignition sources. Gas monitoring: Use stationary and/or portable NOx monitors in the working place.

### Conditions and Measures Related to Personal Protection, Hygiene, and Health Evaluation

**General:** Work under a high standard of personal hygiene. Wash hands and face before breaks. Do not eat, drink or smoke in the working area.

**Respiratory protection:** In case there is any risk of inhalation exposure to the substance, always wear a full face mask with an acid gas cartridge or wear a supplied air respirator/helmet/suit. Potential inhalation exposure to the substance must be kept to a minimum. The smallest amount inhaled may already have (acute and/or delayed) effects on the respiratory tract.

**Dermal and eye protection:** In case there is any risk of dermal exposure (via contaminated equipment), always wear suitable acid resistant protective clothing in the working area and wear acid resistant gloves conforming to EN374 (and chemical safety goggles/full-face shield conforming to EN166). Potential dermal exposure to the substance must be kept to a minimum. The smallest amount of an aqueous solution of the substance may already cause severe burns and/or eye damage. When aerosols/mists of nitric acid can be formed, wear a suitable acid resistant chemical safety suit with a supplied air respirator/helmet/suit. Suitable material: butyl/fluorinated rubber.

## 3. EXPOSURE ESTIMATION AND REFERENCE TO ITS SOURCE

<table>
<thead>
<tr>
<th>Environment Exposure Estimation</th>
<th>Not determined Quantitative exposure and risk assessment not available</th>
</tr>
</thead>
<tbody>
<tr>
<td>Health Exposure Estimation</td>
<td>Not determined Quantitative exposure and risk assessment not available</td>
</tr>
</tbody>
</table>

## 4. GUIDANCE TO DOWNSTREAM USER FOR EVALUATING EMPLOYEE WHETHER HE WORKS INSIDE THE BOUNDARIES SET BY THE ES

### Environmental exposure

As no environmental hazard was identified no environmental-related exposure assessment and risk characterisation was performed.

### Control of worker exposure

Predicted exposures are not expected to exceed the applicable exposure limits (given in section 8 of the SDS) when the operational conditions/risk management measures given in section 2 are implemented.

### Guidance to check compliance with the exposure scenario

If scaling reveals a condition of unsafe use (i.e., RCRs > 1), additional RMMs or a site-specific chemical safety assessment is required. For scaling see ECETOC TRA, ART, STOFFENMANAGER, EUSES.

Predicted exposures are not expected to exceed the applicable exposure limits (given in section 8 of the SDS) when the operational conditions/risk management measures given in section 2 are implemented.

**Guidance to check compliance with the exposure scenario**

If scaling reveals a condition of unsafe use (i.e., RCRs > 1), additional RMMs or a site-specific chemical safety assessment is required. For scaling see ECETOC TRA, ART, STOFFENMANAGER, EUSES.
## 1. EXPOSURE SCENARIO

### Exposure scenario
- **Title:** Industrial use, Use as an intermediate.

### Use descriptor

#### Sector of use
- SU8 - Manufacture of bulk, large scale chemicals (including petroleum products)
- SU9 - Manufacture of fine chemicals
- SU0 - Other

#### Product category
- PC19 - Intermediates

#### Process categories
- PROC1 - Use in closed process, no likelihood of exposure
- PROC2 - Use in closed, continuous process with occasional controlled exposure (e.g. sampling)
- PROC3 - Use in closed batch process (synthesis or formulation); Industrial setting
- PROC4 - Use in batch and other process (synthesis) where opportunity for exposure arises
- PROC5 - Mixing or blending in batch processes for formulation of mixtures and articles (multi-stage and/or significant contact)
- PROC8a - Transfer of substance or mixture (charging/discharging) from/to vessels/large containers at non dedicated facilities
- PROC8b - Transfer of substance or preparation (charging/discharging) from/to vessels/large containers at dedicated facilities
- PROC9 - Transfer of substance or mixture into small containers (dedicated filling line, including weighing)
- PROC15 - Use as laboratory reagent

#### Environmental release categories
- ERC6a - Industrial use resulting in manufacture of another substance (use of intermediates)

## 2. CONDITIONS OF USE AFFECTING EXPOSURE

### Product characteristics
- **Physical state @20°C:** Liquid, Aqueous solution.
- **Concentration of substance in product:** 60%.
- **Frequency and duration of use:** ≤ 8 hours/day.

### Contributing scenarios

#### Control of environmental exposure

### Process level (source) to prevent release

Technical means in the working area. The activities take place in a standardized way, under controlled conditions with dedicated equipment. In case a certain amount of the substance is not contained, a worker is not exposed to the substance as the use takes place in a fume hood or as the worker wears personal protective equipment and uses local exhaust ventilation. Formation of aerosols/mists/splashes is prevented.

Organisational measures: Minimise the number of staff in the working area. Minimise manual activities. Train employees how to safely handle the substance, incl. how to use personal protection equipment. Regularly clean up the working area. Have supervision in place to regularly check that the conditions of use are followed by the workers. Ensure that all equipment is well maintained. Ascertain that personal protection equipment is available and used according to the instructions. Ensure that eyewash stations and safety showers are available in the working area. Suitable material: The recommended material for tanks, vessels and accessories is low carbon austenitic stainless steel.

Unsuitable materials: Do not use any metal, carbon steel or polypropylene.

Ventilation conditions in the working area: Use only outdoors or in a well-ventilated area (approximately 5 air changes per hour).

Local exhaust ventilation: Use indoor local exhaust ventilation when vapour/mist/spray of nitric acid could be present in the air within the breathing zone of a worker.

Storage conditions: Store in a well-ventilated place (preferably outside). In an area equipped with acid resistant flooring. Protect from sunlight. Keep containers tightly closed. Keep away from combustible materials, heat, hot surfaces, sparks, open flames and other ignition sources.

Gas monitoring: Use stationary and/or portable NOx monitors in the working place.

### Conditions and Measures Related to Personal Protection, Hygiene, and Health Evaluation

**General:** Work under a high standard of personal hygiene. Wash hands and face before breaks. Do not eat, drink or smoke in the working area.

**Respiratory protection:** In case there is any risk of inhalation exposure to the substance, always wear a full face mask with an acid gas cartridge or wear a supplied air Respirator/helmet/suit. Potential inhalation exposure to the substance must be kept to a minimum. The smallest amount inhaled may already have (acute and/or delayed) effects on the respiratory tract.

**Dermal and eye protection:** In case there is any risk of dermal exposure (via contaminated equipment), always wear suitable acid resistant protective clothing in the working area and wear acid resistant gloves conforming to EN374 (and chemical safety goggles/full-face shield conforming to EN166). Potential dermal exposure to the substance must be kept to a minimum. The smallest amount of an aqueous solution of the substance may already cause severe burns and/or eye damage. When aerosols/mists of nitric acid can be formed, wear a suitable acid resistant chemical safety suit with a supplied air Respirator/helmet/suit. Suitable material: butyl/fluorinated rubber.

### 3. EXPOSURE ESTIMATION AND REFERENCE TO ITS SOURCE

| Environment Exposure Estimation | Not determined Quantitative exposure and risk assessment not available |
| Health Exposure Estimation       | Not determined Quantitative exposure and risk assessment not available |

### 4. GUIDANCE TO DOWNSTREAM USER FOR EVALUATING EMPLOYEE WHETHER HE WORKS INSIDE THE BOUNDARIES SET BY THE ES

**Environmental exposure**

As no environmental hazard was identified no environmental-related exposure assessment and risk characterisation was performed.

**Control of worker exposure**

Predicted exposures are not expected to exceed the applicable exposure limits (given in section 8 of the SDS) when the operational conditions/risk management measures given in section 2 are implemented.

**Guidance to check compliance with the exposure scenario**

If scaling reveals a condition of unsafe use (i.e., RCRs > 1), additional RMMs or a site-specific chemical safety assessment is required. For scaling see ECETOC TRA, ART, STOFFENMANAGER, EUSES.
1. EXPOSURE SCENARIO

Exposure scenario 4  Industrial use, Industrial cleaning.

Use descriptor

Sector of use
SU2a - Mining, (without offshore industries)
SU4 - Manufacture of food products
SU6a - Manufacture of wood and wood products
SU8 - Manufacture of bulk, large scale chemicals (including petroleum products)
SU9 - Manufacture of fine chemicals
SU10 - Formulation [mixing] of preparations and/or re-packaging
SU12 - Manufacture of plastics products, including compounding and conversion
SU14 - Manufacture of basic metals, including alloys
SU15 - Manufacture of fabricated metal products, except machinery and equipment
SU16 - Manufacture of computer, electronic and optical products, electrical equipment
SU19 - Building and construction work
SU23 - Recycling

Product category
PC0 - Other Products
PC14 - Metal surface treatment products, including galvanic and electroplating products
PC15 - Non-metal-surface treatment products
PC20 - Products such as pH-regulators, flocculants, precipitants, neutralization agents, other unspecified
PC35 - Washing and cleaning products (including solvent based products)
PC37 - Water treatment chemicals

Process categories
PROC1 - Use in closed process, no likelihood of exposure
PROC2 - Use in closed, continuous process with occasional controlled exposure (e.g. sampling)
PROC3 - Use in closed batch process (synthesis or formulation); Industrial setting
PROC4 - Use in batch and other process (synthesis) where opportunity for exposure arises
PROC5 - Mixing or blending in batch processes for formulation of mixtures and articles (multi-stage and/or significant contact)
PROC7 - Industrial spraying
PROC8a - Transfer of substance or mixture (charging/discharging) from/to vessels/large containers at non dedicated facilities
PROC8b - Transfer of substance or preparation (charging/discharging) from/to vessels/large containers at dedicated facilities
PROC9 - Transfer of substance or mixture into small containers (dedicated filling line, including weighing)
PROC10 - Roller application or brushing
PROC13 - Treatment of articles by dipping and pouring
PROC15 - Use as laboratory reagent

Environmental release categories
ERC4 - Industrial use of processing aids in processes and products, not becoming part of articles
ERC6b - Industrial use of reactive processing aids

#### Technical conditions and measures at process level (source) to prevent release

**Containment:** Under standard operating conditions the substance is rigorously contained by technical means in the working area. The activities take place in a standardized way, under controlled conditions with dedicated equipment. In case a certain amount of the substance is not contained, a worker is not exposed to the substance as the use takes place in a fume hood or as the worker wears personal protective equipment and uses local exhaust ventilation. Formation of aerosols/mists/splashes is prevented.

**Organisational measures:** Minimise the number of staff in the working area. Minimise manual activities. Train employees how to safely handle the substance, incl. how to use personal protection equipment. Regularly clean up the working area. Have supervision in place to regularly check that the conditions of use are followed by the workers. Ensure that all equipment is well maintained. Ascertain that personal protection equipment is available and used according to the instructions. Ensure that eyewash stations and safety showers are available in the working area. Suitable material: The recommended material for tanks, vessels and accessories is low carbon austenitic stainless steel. Unsuitable materials: Do not use any metal, carbon steel or polypropylene.

**Ventilation conditions in the working area:** Use only outdoors or in a well-ventilated area (approximately 5 air changes per hour). Local exhaust ventilation: Use indoor local exhaust ventilation when vapour/mist/spray of nitric acid could be present in the air within the breathing zone of a worker. Storage conditions: Store in a well-ventilated place (preferably outside). In an area equipped with acetic resistant flooring. Protect from sunlight. Keep containers tightly closed. Keep away from combustible materials, heat, hot surfaces, sparks, open flames and other ignition sources. Gas monitoring: Use stationary and/or portable NOx monitors in the working place.

#### Conditions and Measures Related to Personal Protection, Hygiene, and Health Evaluation

**General:** Work under a high standard of personal hygiene. Wash hands and face before breaks. Do not eat, drink or smoke in the working area. **Respiratory protection:** In case there is any risk of inhalation exposure to the substance, always wear a full face mask with an acid gas cartridge or wear a supplied air respirator/helmet/suit. Potential inhalation exposure to the substance must be kept to a minimum. The smallest amount inhaled may already have (acute and/or delayed) effects on the respiratory tract. **Dermal and eye protection:** In case there is any risk of dermal exposure (via contaminated equipment), always wear suitable acid resistant protective clothing in the working area and wear acid resistant gloves conforming to EN374 (and chemical safety goggles/full-face shield conforming to EN166). Potential dermal exposure to the substance must be kept to a minimum. The smallest amount of an aqueous solution of the substance may already cause severe burns and/or eye damage. When aerosols/mists of nitric acid can be formed, wear a suitable acid resistant chemical safety suit with a supplied air respirator/helmet/suit. Suitable material: butyl/fluorinated rubber.
